

Position: Android Developer

OneTech the leading ERP and CRM provider in Albania providing first class solutions in a wide range of industries like Retail, Distribution, Pharmaceuticals, Manufacturing has an opening for an Android Developer.

Responsibilities

- Work with colleagues to build and refine functionality for Android applications.
- Develop innovative, Android-based tools for mobile applications. Work closely with other members of the Development Team to both develop detailed specification documents with clear project deliverables and timelines, and to ensure timely completion of deliverables.
- Work with raw images and layouts from a graphic designer and incorporate them into an app that will run on multiple Android operating system versions and multiple screen sizes
- Determine appropriate architecture, and other technical solutions, and make relevant recommendations.
- Communicate to the Project Manager with efficiency and accuracy any progress and/or delays. Engage in outside-the-box thinking to provide high value-of-service to clients.
Alert colleagues to emerging technologies or applications and the opportunities to integrate them into operations and activities

Qualifications

- 6 months minimum Android development experience
- Strong object-oriented design and programming skills in Java
- 1-year minimum experience working with relational database systems such as SQLite, MySQL, or similar database management system
- Development experience utilizing Android Technologies

- Experience with web service integration (SOAP, REST, JSON, XML)
- Excellent debugging and optimization skills
- Experience with version control
- Good English, both written and verbal will be a plus

We Offer

- Competitive salary and benefits.
- Pleasant working environment.
- Extensive on the job training
